Certificate Course in ASP.NET

Department of Computer Technology Activity Report 2017-18

Organized By: Department of Computer Technology, P.C.E., Nagpur

Event: Workshop on ASP.NET

Date: 20 July 2017 to 27 Feb 2018

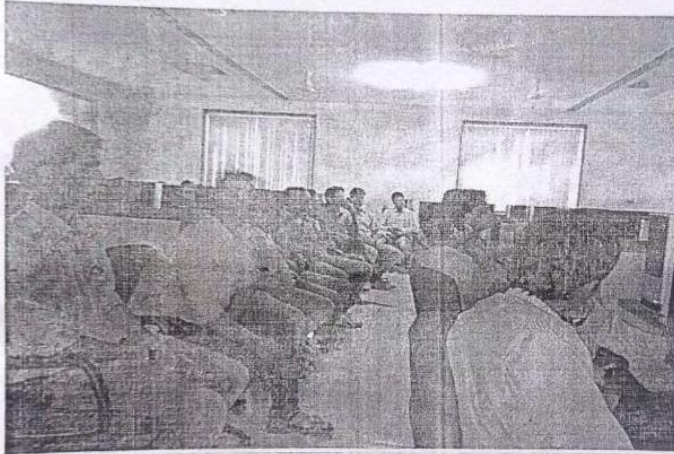

Venue: Computer Department, PCE, Nagpur

Participants: 20

Resource Person: Mr.S.P. Chhaware , Dept of CT,PCE

Event Coordinator: Mrs N.M. Thakare, CT Dept, PCE, Nagpur.

Purpose/Objective: To gain knowledge on Advanced technology i.e. ASP.net through Industry Academia interaction

Remark/Outcome: The hands on practical sessions provided by Mr.S.P. Chhaware, Dept of CT,PCE ,who was trained through the FDP conducted by ATS infotech, Delhi. All participants benefited and gained the detail knowledge of ASP. Net. Interactive session was conducted by trainer. Since ASP.net is most demanding technology in IT industry ,these concepts will be helpful for them to develop the projects . All students attended theory as well as practicals sessions.

About PCE, Nagpur

The Priyadarshini College of Engineering, Nagpur, one of the leading engineering college in progressive and most competitive state of Maharashtra, established in 1919, has been conferred "A" grade by the Government of Maharashtra on the basis of distinct infrastructure and academic achievements. The flag ship institution belonging to Lokmanya Tilak Jankalyan Shikshan Sanstha (L.T.J.S.S) is one of the premier technical institutions in Central India, the ancient land of wisdom and learning. Setup on the sprawling 10.12 acre hilly terrain, the college is known for its world class training of students, its praiseworthy technical support to industries and for its well qualified faculty possessing post graduate and doctoral qualifications. The institution runs 8 UG programs and 5 PG programs along with PhD centre. The institute has collaboration with reputed R&D Organizations and industrial houses for the purpose of taking up joint sponsored research projects.

About the department

Civil engineering department was established in 2008. The department envisages creating world class civil engineers. The department is also accredited with the prestigious National Board of Accreditation up to 30-06-2020. The department is equipped with the required infrastructure and state of the art laboratories.

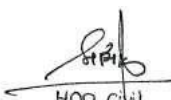

Course Content:

- Introduction of Stadd-Pro layout & Tool bars
- Introduction of stadd-pro layout & tool bars.
- Introduction of Staad entities solving and understanding 2D & 3D Structures
- Staad coordinate system
- Viewing Results & Errors Debugging
- Assigning the properties, material, support & loads to abeam.
- Moving, Wind & Seismic loads.
- Concrete design, Specification & concrete parameters creating geometry of plane frame using the structure wizard.
- Revit structure
- Revit Architecture

ABOUT NAGPUR:

Location - Nagpur, also famous as Orange City. It is practically at geographical center of India. In fact the zero milestone of India is in this city. All major highways NH-7 (Varanasi - Kanyakumari) & NH-6 (Mumbai - Sambalpur - Calcutta) and major railways trunk route (Mumbai, Chennai, Howrah - Delhi) pass through the city. Important Central & State Government offices and Institutions are located in Nagpur. Industrial Development is existing along the fringe areas like Kamptee, Hingna, Wadi, Khapri, Butibori and Kalmeshwar. Nagpur is 837 kms. from Mumbai, 1094 kms south of Delhi, 1092 kms north of Chennai and 1140 kms west of Calcutta.

Five Day Workshop on CATIA Course Content

09/03/2018

1. Introduction to CATIA :

The CATIA Fundamentals course is designed to provide delegates with a broad skill set for using CATIA. It is a starting point for CATIA and the knowledge gained is a prerequisite for many more specialised training courses. CATIA Fundamentals should not be viewed as just a basic course, as together with the key CATIA skills that are on offer, the student will also pick up very important advice on engineering methodologies. The course includes a mixture of presentation and tutorial, enabling students to gain hands-on experience.

2. Sketcher :

You need to constrain the sketches so as to restrict their degrees of freedom and make them stable. The first step is to apply the geometrical constraints to the sketch, some of which are automatically applied, while drawing. After applying the remaining geometrical constraints, you need to add dimensional constraints, using the tools in the Constraint toolbar.

10/03/2018

3. Creating Solids :

There are wire frame elements in CATIA V5 - GSD Module (Surface design). You can use these elements to prepare 2D structure and use this to build your solid model. Generally, sketches are used to build a solid model using Part design module. But for Surface design, 2D Wire frame elements are preferable to build a 3D Surface model.

4. Advanced Sketcher :

The CATIA Version 5 Part Design application makes it possible to design precise 3D mechanical parts with an intuitive and flexible user interface, from sketching in an assembly context to iterative detailed design. CATIA Design application will enable you to accommodate design requirements for parts of various complexities, from simple to advanced.

12/03/2018

5. Transformations :

In translation is a geometric transformation that moves every point of a figure or a space by the same distance in a given direction. A transformation is a one-to-one correspondence between two sets of points or a mapping from one plane to another.

6. Dress-up Features :

Dressing up features is done by applying commands to one or more supports. The application provides a large number of possibilities to achieve the features meeting your needs.

13/03/2018

7. Advanced Solids :

SolidWorks is a solid modeler, and utilizes a parametric feature-based approach which was initially developed by PTC (Creo/Pro-Engineer) to create models and assemblies. The software is written on Parasolid-kernel.

8. Wireframe Geometry :

A wire-frame model is a visual presentation of a 3-dimensional (3D) or physical object used in 3D computer graphics. It is created by specifying each edge of the physical object where two mathematically continuous smooth surfaces meet, or by connecting an object's constituent vertices using straight lines or curves.

14/03/2018

9. Surfaces :

Freeform surface, or freeform surfacing, is used in CAD and other computer graphics software to describe the skin of a 3D geometric element. Freeform surfaces do not have rigid radial dimensions, unlike regular surfaces such as planes, cylinders and conic surfaces. They are used to describe forms such as turbine blades, car bodies and boat hulls. Initially developed for the automotive and aerospace industries, freeform surfacing is now widely used in all engineering design disciplines from consumer goods products to ships. Most systems today use nonuniform rational B-spline (NURBS) mathematics to describe the surface forms; however, there are other methods such as Gordon surfaces or Coons surfaces .

10. Assemblies :

Assembly modeling is a technology and method used by computer-aided design and product visualization computer software systems to handle multiple files that represent components within a product.

11. Drafting :

This will open the New Drawing Creation dialog box. From here you may select the drawing views you want to be placed in the drawing. Or you may choose to start with a blank sheet. In order to change the paper size select modify which will open another dialog, in this dialog use the drop down menu to select the size of paper that you want.

Course on Designing Circuit using Bread Board & PCB Designing using EAGLE software

Organized by: Department of Electronics Engineering.

Participated By : Students Of V,III Sem Electronics Engineering

Venue: Seminar Hall (Electronics Department), IT building.

Dated: 20/7/2017 & 23/7/2017

Event : workshop on "Breadboard Designing & Testing"

Purpose : Students should be able to design the small projects on breadbord & cab be able to test the various components

Resource Persons: Mrs.K.M.Bogawar,Mr.D.Rapelli

Remark:It was very successful workshop.Students really enjoyed the power of Electronics by designing small circuits.Principal Dr.M.P.Singh,HOD DR.S.S.Shriramwar appreciated the students and faculty coordinators for successful completion of workshop.

20/07/17 to 23/07/17

	Topic
1.	Introduction to Electronic Components & Its Testing
2.	Hands on training of testing of components using multimeter
	Hands on training of testing of components using & CRO
3.	Design of Electronic Circuit using breadboard
4.	Hands on training
5.	Design of circuit using LDR
6.	Design of circuits using 555 Timer
7.	Design of Water level indicator
8.	Mini Project

Course on PCB designing

Organized By: Electronics and Telecommunication Engineering Department

Participated By: 63 Students of III Semester

Venue: Seminar Hall, IT Building, WING E

Dated: 27/07/2017 to 30/07/2017

Event: Vocational Training on "PCB Designing"

Purpose: To provide the knowledge of PCB Designing using EAGLE software.

Resource Person: Mr. Niket Malusare and Mr. Shrikant Electus Robotics, Pvt Ltd. Nagpur.

Remarks/Conclusion:

The students of Third semester participated in the PCB Designing training conducted by Mr. Niket Malusare and Mr. Shrikant, Electus Robotics, Pvt Ltd. The designing of the electronic circuitry was done on EAGLE software. All the steps of the PCB Designing were explained by the expert. Different electronic components were fabricated on the PCB by the students. The students were amazed to see the working models of the fabricated boards.

PCB Designing

Course contents

Session 1:

- Importance of major project & mini project in engineering
- A practical approach towards project making
- Why it is essential for students to create their own projects themselves instead of purchasing it from market?
- Introduction to basic electronics components
- How to select right components for your project
- Basic concept of circuit designing
- Introduction to bread boarding
- Hands on session on bread boarding
- Trouble shooting problems

Session 2:

- Importance of PCB designing ,PCB designing rules
- introduction to eagle software & its importance in industry
- Creating your first eagle schematic
- Designing your first Eagle PCB

Session 3:

- Designing circuits with IC's , creating your main schematic
- Designing your Main PCB
- Overview of PCB manufacturing process

Session 4:

- Hands on PCB manufacturing process
- Transfer image to copper base
- PCB Etching,Drilling your PCB
- Soldering various components on PCB ,testing

Course on PLC Scada

Organized By: Electronics and Telecommunication Engineering Department

Participated By: 27 Students of V & VII Semester

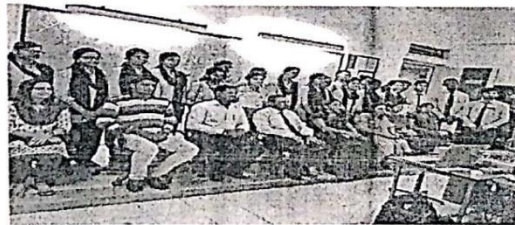

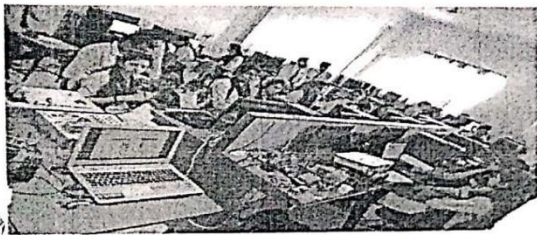

Venue: Seminar Hall, IT Building, WING E

Dated: 10/8/17 to 12/8/17

Event: Workshop on "PLC & SCADA" (ISTE APPROVED)

Purpose: To provide the training on widely used automation system which includes PLC & SCADA and students will be able to know how to design automation system using PLCs.

Resource Person: Mr. Dinesh Nimbalkar, From Krish Infotech, Nagpur.

Remarks/Conclusion:

The students of Fifth and seventh semester participated in the PLC & SCADA workshop conducted by Mr. Dinesh Nimbalkar, from Krish Infotech. The designing of the automation system was done using PLCs. All the steps of the PLCs Designing were explained by the expert. The students were amazed to see the working models of the automation system.

Duration: 12 Hrs. (2 Days)

PLC

Module	Topic
1.	Industrial Automation
2.	Overview of PLC
3.	CPU
4.	I/O System & wiring
5.	Prog Terminal & Peripherals
6.	Ladder Logic Creation & examples
7.	NO / NC Logic Building
8.	Forcing
9.	Timer Instructions
10.	Counter Instructions
11.	Analog Instructions

* Computer Lab machines should have Operating system WinXP SP2 atleast.
Projector for presentation of programs will be in client scope.
Training will be provided on PLC Software:- Rslogix 500 (Allen Bradley) and PLC
Hardware MicroLogix 1000.

Lab Experiments Covered:

Logic Gates practical (AND / OR / NOT/ NAND/NOR/EX-OR)
NO / NC Basic examples
Motor Example (Time Based Starting/stopping & Forward/Reverse)
Analog Examples

Training Benefits:-

>Participant will get practical knowledge and will be easy for them to solve the PLC ladder logics.
> PLC fundamentals will be cleared.

Module 1- Industrial Automation

This module provides an overview of automation concepts and its constituents. History of Automation and its various types in the market. Advantages & Benefits to working engineers.

Learning Outcomes:

Upon completion of this module the participant will be able to:

- Importance of Automation
- Its various modules/aspects
- Need of automation in today market
- Understand the benefits.

Module 2 - Overview of PLCs

This module provides a general overview of PLCs and their application in industry. The origins of the PLC and its evolution are covered in detail. The advantages of PLCs are also outlined, and the main components associated with PLC systems are explored. An introduction to ladder logic is presented and the most common types of PLC signals are covered with an emphasis on practical application.

Learning Outcomes:

Upon completion of this module the participant will be able to:

- Describe the purpose of a control panel.
- Define a programmable controller.
- List six factors affecting the original design of programmable controllers.
- Name three advantages of PLCs compared to relay logic systems.
- List the three main components in a PLC system.
- Understand the term ladder logic.
- Describe the application of PLC signals.
- Explain the difference between a bit and a word.

Module 3 - Central Processing Unit

This course is intended to familiarize the participant with the most important aspects of the PLC's central processing unit. Topics covered in the course include memory devices and memory storage, as well as an introduction to data storage and processing. In addition to covering memory utilization and memory mapping, the course also provides detailed information on CPU types and PLC scan functions.

Learning Outcomes:

Upon completion of this module the participant will be able to:

- Define the term CPU.
- Explain the purpose of the executive program.
- Understand the application of buses in a CPU.
- Explain the advantage of multiprocessing.
- Describe the two general classes of memory devices.
- Name four types of memory.
- Explain the purpose of memory utilization and how it applies to PLC systems.
- Describe the scan function.

Module 4 - I/O System

This course covers all aspects of the Input/Output system for PLCs including discrete, analog, and data I/O. Course topics also include the principles of remote I/O and an introduction to scaling and resolution of analog devices and signals.

Learning Outcomes:

Upon completion of this module the participant will be able to:

- Explain the purpose of the I/O system
- Describe how I/O addressing is accomplished.
- Define discrete inputs.
- List four tasks performed by an input module.
- Describe the basic operation of a discrete output.
- Explain the purpose of data I/O interfaces.
- Define analog I/O.
- Explain the purpose of remote I/O.

Module 5 - Programming Terminals and Peripherals

This course is intended to provide participants with an overview of the wide range of programming terminals currently in use and to outline some of the key differences between them. In addition, the course covers topics such as hand-held programming terminals and computer-based software packages. The operation of host computer-based systems is also covered as well as the application of peripheral devices in a PLC network.

Learning Outcomes:

Upon completion of this module the Participant will be able to:

- Define the term programming terminal.
- Describe the application of dedicated programming terminals.
- Differentiate between programming software and documentation software.
- Describe the function of a host computer-based PLC system.
- Explain the purpose of peripheral devices.

Module 6 - Ladder Logic

This course provides an introduction to ladder logic programming techniques using laboratory simulation software. The lab component of the course provides the participant with an opportunity to write ladder logic programs and test their operation through PLC simulation. Topics covered in the course include I/O instructions, safety circuitry, programming restrictions, and I/O addressing.

Learning Outcomes:

Upon completion of this module the participant will be able to:

- Define ladder logic.
- Explain the purpose of I/O addresses.
- Describe the function of soft wiring, branches, and rungs.
- Write a ladder logic program.
- Run a ladder logic program using lab simulator.
- Define the terms examine on and examine off.
- Explain the purpose of a latching relay instruction.
- Differentiate between an internal output and an actual I/O output.
- Describe the operation controller scan.
- Name two programming restrictions.
- Define nesting.
- Explain why safety circuitry is important in ladder logic systems.
- List three types of I/O addressing.

Module 7 – NO/NC Logic

This course provides a thorough treatment of logic and its application in PLC programming and control. In addition, the participant will become adept at converting control logic to ladder logic.

Learning Outcomes:

Upon completion of this module the participant will be able to:

- Apply NO/NC to troubleshooting
- List five logic gates.
- Describe the basic operation of an inverter.
- Explain the purpose of No/Nc diagrams.
- Apply logic gate combinations to PLC control.
- Convert digital logic to ladder logic.

Module 8 - FORCE Instructions

This course is intended to provide an overview of forcing control techniques. Force instructions are presented and demonstrated through lab simulation software. The simulation software also allows the participant to program and observe branching operations.

Learning Outcomes:

Upon completion of this module the participant will be able to:

- Describe the purpose of first failure annunciators.
- Explain the advantage of using forcing
- How to manage output energizing through software.
- Use the FORCE instruction for troubleshooting

Module 9 - Timers

This course is intended to provide participants with an overview of PLC timers and their application in industrial control circuits. Timing functions such as TON, TOF, and RTO are discussed in detail and the theory is reinforced through lab projects using lab simulation software. In addition, participants will learn practical programming techniques for timers including cascading and reciprocating timing circuits.

Learning Outcomes:

Upon completion of this module the participant will be able to:

- Name two types of relay logic timers.
- List the four basic types of PLC timers.
- Describe the function of a time-driven circuit.
- Differentiate between an ON-delay and an OFF-delay instruction.

- Write a ladder logic program using timers.
- Describe the operating principle of retentive timers.
- Explain the purpose of cascading timers.

Module 10 - Counters

This course provides participants with a broad overview of PLC counters and their application in control systems. Counting functions such as CTU and CTD are presented in detail and the theory is reinforced through lab projects using lab simulation software. In addition, participants will learn practical programming techniques for counters including cascading counters and combining counting and timing circuits.

Learning Outcomes:

Upon completion of this module the participant will be able to:

- Define the two basic types of PLC counters.
- Write a ladder logic program using CTU, CTD, and RES.
- Design an up/down counter.
- Define cascading counters.
- Explain the advantages of combining timers and counters.
- Comparing the counter values.

Course on Career Counseling

Department Organized :- MECHANICAL DEPARTMENT, PCR Nagpur

Event :- Four days workshop on Career counselling

Participated By :- Students of Mechanical Engineering Department

Venue :- Seminar Hall, Mechanical department PCR Nagpur

Purpose :- The event was organized to provide various career opportunities in foreign countries.

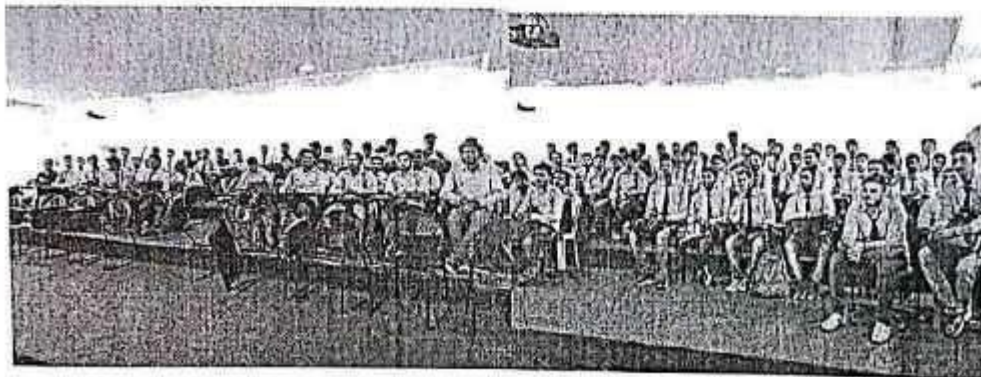

Dignitaries :- Mr. Prafulla Acharya (Sr. Manager- Overseas Education Counseling),

Mr. Karan Kumar, Dr. R. S. Zakiruddin (H. O. D. Mechanical), Dr. C. N. Saklode,

Dr S.N. Waghmare & Prof. N.R. Pathare

Date :- 30/01/2018 to 2/2/2018

No. of Students :- 50

REMARK/CONCLUSION:

1. The students know the various career opportunities in foreign countries.
2. Students also learn about the various career opportunities in Mechanical field

30/1/18

Topic 1: The oldest professions and the history of their evolution

General aims and Cognitive: student learns about the reasons, course and effects of changes in professions done by people since the ancient times.

31/01/18

Topic 2: Job interview

General aims. Cognitive: familiarising the participants with the course of a proper job interview. Educational: mastering the skills of self-presentation. Educational: shaping attitudes needed in proper functioning in society. Operational aims.

A student knows:-

The course of a job interview

The basic questions that can appear during a job interview

The vocabulary connected with the topic: recruiter, recruitment sheet.

A student understands/explains

The meaning of a job interview for the recruitment process.

The meaning of questions during a job interview

DEPARTMENT OF ELECTRICAL ENGINEERING
REPORT ON ACTIVITIES CONDUCTED: 2017-18 Even

Title	3-days training program on "Power Plant Familiarization
Name of Activity	training program
Date	8 th - 10 th February 2018.
Venue	National Power Training Institute (NPTI), Nagpur
Organized by	Electrical Department
Experts	Mr. P. Mawle, Asstt. Director, Mr. S. Titoniya , Dy. Director, NPTI
Faculty Coordinator	Prof. C. S. Kamble , Prof. R. A. Rewatkar
Student Coordinator	Mr. Ankur Roy
Details	The training program was organized by department of Electrical Engineering to know the power plant operation , various processes and equipments used in power plant.It also includes power plant fundamentals through lectured delivered by working engineers from KTPS followed by visit at power plant, Khaparkheda
Students participation	105 IV A & B (List of students attached)
Photo	Attached
Outcome of Activity	Students would be able to understand structure of Power plant and its operation & control.

"Training Programme on Power Generation Engineering, Operation and its Control"

NPTI, Nagpur is organizing "Training Programme on Power Generation Engineering Operation and its Control" aspects of Thermal Power Plant and Gas Based Power plant for the students of 2nd year, 3rd year and 4th year Engineering & Polytechnic colleges (All Branches) and pass out engineers.

> Aiming to

- To provide a common platform to share best practices used in areas of power sector among the students.
- To raise awareness for the need of excellence in power industry for the students interested to work in different areas of Power industry.
- To provide a platform for interaction amongst the power industries and Students/operators for technological development.

> Contains

The Main Training programme contains 2 sub-programs of 3 days each and Accordingly two certificates will be given to each participant as follows.

Training Program 1: Training Programme on Power Generation Engineering.

Training Program 2: Training Programme on Power Plant Operation & its Control.

> Training Covers:-

- 1) Present Power Scenario in India
- 2) Thermal Power station operation.
- 3) Operation of Gas Based Power station.
- 4) Various Operating Devices of T.P.P.
- 5) Overview of various electronics and computing devices with their function in power plant.
- 6) Overview of substation Equipments & their functions
- 7) Operation & control of Power using various controlling instruments.
- 8) Visit to 210 MW Thermal Power Plant Simulator
- 9) Opportunities and scope for the students in present power Scenario.

> Program Venue: - Main Building, National Power Training Institute, South Ambazari road, Opposite VNT, Gopal Nagar, Nagpur - 440022.

> Tentative Dates: - Programme will be conducted as per suitability / Availability dates of students as Even session of Engg/Diploma is starting in the month of January. Tentative Date will be _____ to _____ specially for your Engg. College /Institute/Organization

> Training Fees at NPTI Nagpur:- Considering the target participants to be students the Training fees is kept at minimum at Rs. 600/- per trainee for 2 programs(6 Days).

> The course fees are inclusive of service tax @15%.

> Registration form along with fees as per Part 1 & 2 should be send OR to submit it at the time of Course Start. For any query regarding course please contact to

> N.P.T.I. Training Coordinator, Shri. P.P.Mawle Mob.No.8600260109.

> Email id: ppmawle@yahoo.com

> Trainees will be awarded with 2 certificates.

> Last Date for confirmation of the of the Program: 18th Jan.2017
